When it's Tulip Time —

your garden may be a blaze of color—a picture inspired by your own imagination and accomplished by the creative impulse to fashion beauty as a means of self-expression.

The time to plan and plant the spring garden is here

Seemingly endless are the possibilities of color combinations and their arrangement in the garden. The material at the gardener's disposal to bring glory into the spring garden is wide and varied. Tulips, Daffodils, and Hyacinths are excellent for bold displays, and all the smaller bulbs, like Crocus, Snowdrops, Scillas, Grape Hyacinths, etc., add dainty loveliness to beds, borders, and rock gardens. Iris, Peonies, Phlox, and stately Lilies, as well as all the others offered in this book, are also planted in the fall.

And how interesting it is to watch bulbs grow and bloom when planted in pots or bowls for winter blooming in the house. Their rich fragrance, pure colors, and lovely texture are never more appreciated than during winter.

There is another most important reason why you should plant all kinds of bulbs most liberally this fall. The **PRICES ARE SO LOW THIS YEAR** that a showy garden which will last for years can be had at a very moderate cost.

Giant Breeder Tulips

Magnificent Large Blooms in Beautiful Art Shades

This class of Tulips is, without question, the most striking. The flowers are truly superb in every way, but their rich and unusual coloring places them in a class by themselves. With their tall majestic growth and truly enormous blooms they rival the finest of the Darwins. Their colors favor the unusual and artistic shades, including hues and tints not found in any other flower. It is this characteristic which has given them their well-deserved popularity, for they are graceful, showy, and make a magnificent display. Splendid for beds, borders, amidst perennials, and for cutting.

Apricot

9253 Abd-el-Kadir A beautiful antique bronzy yellow shade. Toward the edges the petals have a light bronze cast and the inside is shaded with mahogany. This combination of colors is beautiful and most interesting. A splendid tall-growing and stately Breeder Tulip with large well-formed blooms carried on elegant long stems. Showy in the garden and a fine cut-flower; 26 inches. 3 for 25¢; 12 for 70¢; 100 for \$5.00.

9252 Apricot A lovely ruddy apricot tint with a seam of bright bronzy buff. The base of the petals is yellow shading into an olive-green halo. Glorious large blooms on strong, sturdy stems. Those who admire art shades will be delighted with this colorful large-flowering variety; 25 inches tall. 3 for 20¢; 12 for 65¢; 100 for \$4.50.

9254 Bacchus The dark violet-blue flowers give a magnificent display in the garden and are always greatly admired as cut-flowers. The outside of the petals is a still richer tone of violet-blue than the inside. The base is relieved on the inside by a white star, adding good color contrast; 28 inches tall. 3 for 25¢; 12 for 75¢; 100 for \$5.25.

9255 Bronze Queen A well-formed showy Breeder Tulip of an attractive buff shade tinged with apricot and golden bronze on the inside of the petals. The flowers are remarkably large. They are carried on long strong stems. Bronze Queen is an excellent variety for bedding and is also adapted for forcing. The blooms are of artistic proportions and substantial texture. Grows 26 inches tall. 3 for 20¢; 12 for 60¢; 100 for \$4.25.

9257 Cardinal Manning An odd pastel wine-red shaded with warm rosy brown. A most impressive and stately variety, widely grown on account of its quaint yet beautiful color. The blooms are large and substantial. Splendid for garden display and for cutting, lasting a long time; 24 inches. 3 for 20¢; 12 for 65¢; 100 for \$4.50.

9261 Don Pedro An appealing shade of rich coffee-brown toned with rich mahogany-red. The inside of the petals is a glossy mahogany color. Don Pedro has a most delightful fragrance and is, therefore, greatly appreciated as a cut-flower. The blooms are carried on long stems 23 inches tall. 3 for 20¢; 12 for 60¢; 100 for \$5.00.

9269 Godet Parfait A great favorite with large showy blooms of an intense rich blue-purple color with a white base and a blue halo. It makes a striking display in the garden and lasts a long time as a cut-flower. Every gardener should include this splendid variety; 26 inches tall. 3 for 20¢; 12 for 60¢; 100 for \$5.00.

Free Cultural Leaflet Bulbs for Winter and Spring Blooming

This leaflet has been prepared to help gardeners everywhere to grow the finest flowers from bulbs for winter and spring blooming. We shall be glad to send you a copy if you will ask for it on your order. It gives cultural directions for growing Hyacinths, Tulips, Narcissus, Amaryllis, and Freesias.

The May-Flowering or Old English Cottage Tulips are similar in appearance to the Darwin Tulips. They also bloom at the same time. This is a great advantage as it permits the planting together of both classes in one bed and having the varieties in bloom all about the same time. The Breeder Tulips may also be combined with them for the very same reasons. They are unsurpassed for bedding, to be planted either alone or in clumps, or placed in the foreground of shrubbery or in the perennial border. They are essentially garden tulips, not recommended for growing indoors.

9202 Ambrosia A beautiful lilac-rose with a broad edge of bright tan. The inside of the petals is vivid orange changing to a light tan as the flowers age. It is one of the newer Cottage Tulips with large blooms on stems 24 inches tall. 3 for 25¢; 12 for 80¢; 100 for \$5.75.

9201 Argo A particularly fine variety which, unlike others, is suited for forcing. The elegant large flowers are a delicate bronzy salmon shade. Grown in the open the blooms are yellow marked with red and shaded brown; 22 inches. 3 for 25¢; 12 for 70¢; 100 for \$5.00.

9203 Avis Kennicott A beautiful bright chrome yellow Cottage Tulip with a black base and black anthers. It gives a wonderful display. The very large, long-pointed flowers are highly valued for garden display and for cutting. Height, 23 inches. 3 for 25¢; 12 for 80¢; 100 for \$5.75.

9204 Buff Beauty Bright salmon-orange with a shading of buff. The center is orange, toned with yellow. A graceful large flower carried on long stems; 20 inches tall. 3 for 30¢; 12 for 90¢; 100 for \$6.50.

9398 Dido Lovely rich coral-pink flowers edged vivid orange. The inside of the blooms is a bright flame color with a broad edge of salmon-orange. The yellow base and bright green halo add to its attractiveness. A striking new variety; 28 inches. 3 for 30¢; 12 for 90¢; 100 for \$6.50.

9207 General French A most imposing large flower of excellent form and a rich cerise-red color. The base of the petals is blue. The form of the blooms is elongated with graceful large petals. A most desirable variety. Height, 26 inches. 3 for 30¢; 12 for 95¢; 100 for \$7.00.

9211 Golden Wonder Indeed a wonder in every respect. The blooms are rich golden yellow shaded with a warm tone of brown. The black anthers create a most interesting color contrast. When in full bloom the entire flowers are bright golden yellow. It is a cross between Cottage, Bouton d'Or and Darwin, La Tulipe Noire. Height, 24 inches. 3 for 30¢; 12 for 90¢; 100 for \$6.50.

9208 Grenadier Huge orange-scarlet flowers of wonderful form and heavy substance. A particularly showy variety which dazzles the eye when seen in bright sunlight. Makes its best display if planted together with a rich yellow variety, or in the foreground of shrubs which with their green foliage accentuate the bright color of the flowers. Height, 24 inches. 3 for 20¢; 12 for 65¢; 100 for \$4.50.

Whether planted in masses or grouped six or a dozen bulbs together, Cottage Tulips are always a garden feature during the month of May.

Tulips must be planted in the fall

9212 Idyll A charming variety with blooms of largest size and substantial texture. The color is truly remarkable. It is a light yet **delicate rose** with an appealing satiny sheen. The inside of the petals is shaded with salmon-pink. Splendid for garden display and for cutting. Height, 22 inches. 3 for 20¢; 12 for 60¢; 100 for \$4.25.

9215 Inglescombe Yellow A most popular variety much in demand for planting together, with the various colors of the Darwin and Cottage Tulips because the latter do not contain any moderately priced, pure yellow shades. The large, well-formed blooms are **bright golden yellow**, sometimes showing a scarlet edge as they age. Height, 19 inches. 3 for 20¢; 12 for 60¢; 100 for \$4.00.

9216 John Ruskin This has made a reputation for itself. It is a most unusual variety, combining a number of rare shades into a charming color. The general tone is **soft salmon-rose**. The edges show a broad seam of lemon-yellow. The inside is shaded rosy lilac and edged soft yellow; 16 inches. 3 for 20¢; 12 for 65¢; 100 for \$4.50.

9222 Monsieur S. Mottet

Beautiful **ivory-white** flowers. Instead of producing one bloom to a stem, this variety carries 4 to 6 blossoms on a stem, all open at one time. The result is unique, making it a splendid garden variety and cut-flower. Not merely an oddity but a useful addition. Height, 25 inches. 3 for 25¢; 12 for 80¢; 100 for \$5.75.

9221 Moonlight

A lovely soft and quiet shade of clear **canary-yellow**. The blooms are oval in shape with the outer petals reflexing at the tips as the blooms open. Fully open, the flowers form a beautiful star of rare beauty. Splendid for cutting; 25 inches. 3 for 20¢; 12 for 65¢; 100 for \$4.50.

9220 Mrs. Moon

A beautiful **deep lemon-yellow** flower, in shape not unlike that of a Lily. Before the flowers open fully they are quite long but later the petals reflex gracefully; 25 inches. 3 for 25¢; 12 for 75¢; 100 for \$5.25.

Moonlight

9223 Orange King

This should be in every garden. A magnificent flower of extreme size, artistic proportions, and a marvelous color. The outside of the petals is **deep orange** with a cast of rose. The inside is orange-scarlet. Its lovely sweet fragrance is a valuable feature; 19 inches. 3 for 20¢; 12 for 60¢; 100 for \$4.25.

9229 Picotee (Maiden's Blush) The unusual combination of colors presented by this splendid Cottage Tulip explains its world-wide popularity. The blooms are of Lily form. They are **white** with a broad **margin of deep rose**. Picotee makes a showy display in the garden and is highly valued for cutting. Large flowers and strong growing; 22 inches. 3 for 20¢; 12 for 65¢; 100 for \$4.50.

9227 Rosabella

We have added this variety to our catalog as it belongs indeed in a list of the best varieties. The flowers are a beautiful **carmine-rose** with a broad white edge. The inside is flesh pink with creamy center. Unlike most other Cottage Tulips, Rosabella is suited for growing in pots indoors for flowering during March and April. Also fine for garden display. Height, 18 inches. 3 for 25¢; 12 for 75¢; 100 for \$5.50.

9225 Scarlet Emperor

A majestic brilliant flower that makes a display in the garden unequalled by any other color. Words fail to adequately describe the brilliance and glow of these magnificent large **scarlet** blooms, shading into clear yellow toward the center. Of stately growth and long stemmed. The blooms are large, well formed, and of substantial texture. 3 for 40¢; 12 for \$1.40; 100 for \$10.00.

9226 Sirene This is another of the so-called Lily-flowered Tulips which have become immensely popular within recent years. The individual flower petals are fairly narrow and sharply pointed, giving the flower an elongated appearance with the tips of the petals carefully curved upward. The color of the blooms is **rich cerise-pink** with a margin of soft pink and a white base. Height, 16 inches. 3 for 20¢; 12 for 65¢; 100 for \$4.50.

9234 The Fawn

When the blooms begin to open they exhibit a lovely and bright shade of **rosy amber**. As they open up fully the color changes to a pleasing warm shade of rich cream, artistically splashed with rose. Those who have a liking for delicate colors will be much pleased with this splendid variety. Height, 18 inches. 3 for 20¢; 12 for 65¢; 100 for \$4.50.

9332 Vesta

Upon opening, the blooms are creamy white, but as the days go on and they open up more fully they change to a **beautiful paper white**. The base of the blooms, however, remains yellow throughout the life of the flower. The anthers are black and add greatly to the beauty of the blooms. Vesta is a strong grower and large flowered. Height, 29 inches. 3 for 30¢; 12 for 90¢; 100 for \$6.50.

9236 Cottage Tulips

Giant Darwin Tulips

This class of Tulips is extremely popular. The plants are of strong, tall growth and the flowers are large, well formed, and come in many bright colors. They are splendid for planting in formal beds, but their boldness, stately habit, and rich colors make them also ideal for planting in clumps of 6 to 12 bulbs amidst the perennial border or in the foreground of shrubbery. They are as well suited for small gardens as for large ones. Many gardeners combine their Darwins with varieties from the Breeder and Cottage classes, because they all bloom at approximately the same time. The Early Single Tulips, by reason of their blooming season, which comes two to four weeks ahead of other Tulips, always have been great favorites for garden display and for cutting. They may be planted in formal beds or clumped together in the perennial border. For blooming indoors during the winter they are superb. For outdoor blooming, plant preferably during the late fall and cover 3 to 5 inches deep with fine soil. Where alternate freezing and thawing are usual, cover the beds with a 2 or 3 inch layer of straw or pine boughs. This is to shade the surface and not to keep the soil warm. For indoor blooming, plant in shallow pans, one variety to each pan, keep dark for six to eight weeks, and then bring into a cool room for the plants to develop into fine specimens.

The Rembrandt Tulips resemble the Darwins in general habit of growth but the flowers differ in that the colors are "broken," representing color combinations in feathered, striped, and flaked designs of irregular arrangement. Rembrandt Tulips are easy to grow and give a splendid display in the garden, particularly if they are grouped six to twelve bulbs together amidst perennials or in the foreground of shrubbery. Their varied and artistic color arrangement, however, is most appreciated when displayed as cut-flowers.

Cluster-Flowered Narcissus Poetaz

Laurens
Koster

The Poetaz Narcissus are also called Tazetta and Tazetta Hybrids. They represent Hybrids of the Poeticus type and the Polyanthus Narcissus, with their cluster-flowered habit inherited from the latter but the size of the blooms from the former. Each flower-stem carries from 3 to 8 blooms. Fine for garden display, naturalizing, and for growing indoors for winter blooming in pots. They are hardy.

The Popular Jonquils Narcissus Jonquilla

The grace and charm of this type of Narcissus have made them extremely popular. The blooms are borne in clusters on top of a strong tall stem. They are a bright yellow color and look well naturalized in the garden, or they may be used to good advantage for cutting. Their sweet fragrance adds another feature that highly recommends their use for garden decoration and for cutting.

9468 Giganteus This is the finest and best of all Hybrids. Superior in size, form, and perfume to any other. Its clusters are composed of many rich yellow blooms. It flowers early and is easily grown indoors for early spring blooming. We highly recommend it. 12¢ each; 3 for 30¢; 12 for \$1.00; 100 for \$7.50.

9469 Orange Queen The name of this variety is likely to mislead gardeners, as under our conditions the blooms are a rich deep yellow rather than an orange shade. 9489 Triandrus albus This is the "Angel's Tears" of old Portugal. Graceful flowers about ¾ inch long, carried on stems six inches tall. NARCISSUS

for Growing
in Water and Pebbles

9460 Paper White

No other flowering bulb can be relied upon to give as quick and showy a display as the Paper White Narcissus. They may be had in bloom throughout the winter and spring by making succession plantings. All that is needed is a bowl, pebbles or fibre, and water. The American-grown bulbs which we offer are sure to give satisfactory results, but we recommend planting them not before the end of November in order to insure a display of large, showy blooms. Our experience is that the best results are obtainable by late planting. It is important to get the bulbs to develop a good root system before the top growth begins by placing them in a cool cellar or closet for several weeks before they are brought to light and flowered in a cool room. 3 for 20¢; 12 for 65¢; 100 for \$4.50.

9459 Soleil d'Or This splendid Narcissus is in many ways similar to the Paper White, but the blooms are an intense yellow color. The center of the cup is shaded with orange. It may be grown in pebbles or fibre, the same as the Paper Whites offered above. 16¢ each; 3 for 45¢; 12 for \$1.60; 100 for \$12.00.

Mammoth Size Bulbs for Forcing in the House or Planting in the Garden

Hyacinths are easy to grow outdoors in beds or borders. Depending on the texture of the soil, they may be covered 2 to 6 inches deep and protected with a 3 inch layer of strawy leaves or long manure to prevent alternate freezing and thawing of the soil. This cover must be removed promptly with the first warm days of spring.

While large beds in regular outline planted with Hyacinths make a very good showing, gardeners should not overlook the possibilities that present themselves by planting 6 to 8 bulbs together in a clump in the foreground of some shrubbery or in the perennial border. The bulbs may be left in the ground and should best be planted 4 to 6 inches deep to escape any injury due to cultivating the beds during the summer.

Hyacinths are also fine for growing indoors during the winter in pots or pans or in special Hyacinth glasses filled with water. Write for the Burpee leaflet, "Bulbs for Winter and Spring Blooming."

9004 Enchantress A lovely variety with attractive long-stemmed flower-spikes. The individual bells are closely set on a strong stem. They are a beautiful **light delft-blue** shaded with somewhat deeper blue. Valuable for garden display and for forcing.

9006 Gertrude Magnificent compact trusses closely set with rich **carmine-rose** bells. This is the favorite variety for outdoor bedding because the plants make a splendid uniform growth and bloom all at one time. Easily forced.

9007 Grand Maitre A glorious spike of large bells closely set on a long and strong stem. The color is a rich **deep porcelain-blue** of unusual appeal. Grand Maitre is equally well suited for outdoor growing and for forcing.

9009 King of the Blues Those who admire rich deep shades will be particularly pleased with King of the Blues. It is, in our opinion, one of the best belonging to the **deep blue** class, with elegant, long and graceful spikes.

9014 Lady Derby Clear **rich-rose** blooms forming a solid and strong spike of color. Grown indoors the flowers are a shade deeper in color.

9012 La Grandesse An elegant spike closely set with beautiful large bells of a clear waxy **white**. It is a splendid variety for forcing.

9019 La Victoire One of the earliest of all Hyacinths to come into bloom. The flowers are a brilliant **scarlet-red**. When grown indoors they have a tendency to be lighter.

9023 L'Innocence Elegant large **white** bells gracefully arranged on a strong, heavy stem. It makes a beautiful display and is easily forced.

9016 Lord Balfour An early-flowering Hyacinth and one of the best in its color class. The large, well-formed flowers form a solid truss of **lilac-rose**, shaded dark violet.

9033 Queen of the Pinks A particularly lovely **rose-pink**, forming large broad trusses closely set with good-sized bells. Strong stemmed. Fine for bedding and valuable for late forcing.

9031 Yellow Hammer This is quite a good deep shade of **creamy yellow**. Yellow Hammer is easily forced and gives elegant long showy flower-spikes. Also suited for outdoors.

The First Flowers of Spring

SNOWDROPS

9496 Giant Snowdrops

(*Galanthus nivalis* Elwesii) The earliest of all outdoor flowering bulbs, ideal for naturalizing among perennials or in the foreground of shrubs. By making plantings in different locations it is easy to have a succession of blooms for three weeks and longer. It looks its best if the bulbs are planted in masses of 50 or more. Plant 2 inches deep and 3 to 4 inches apart. 3 for 15¢; 12 for 50¢; 100 for \$3.50.

Order 6 bulbs of the same variety at 1/2 the 12 price; 25 bulbs or more at the 100 rate; 250 bulbs or more at the 1000 rate

9498 Snowflakes
(*Leucojum aestivum*)

Dainty, white, bell-shaped, pendant flowers attractively tipped with green and gracefully arranged on a nodding stem 12 to 15 inches in length. Begins blooming in early May and is particularly valuable for naturalizing among shrubbery or in the rock garden. Space the bulbs 8 inches apart and cover them 4 to 6 inches deep. They do best in a deep, rich, moderately moist soil. 3 for 30¢; 12 for 90¢; 100 for \$6.50.

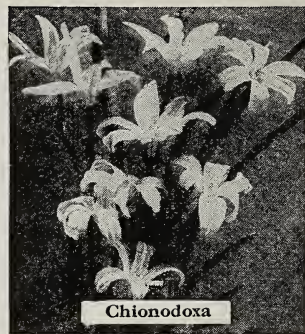

The early spring flowers always have had a particular appeal to gardeners. Though they are not large, they seem to mean so much to us because they are the first ones. Plant them plentifully: Snowdrops, Crocus, Scillas, and all the others listed on this and the following page. Plant some *Chionodoxa* this year too. They make a splendid show, are perfectly hardy, and will last almost indefinitely. Fritillaria, Grape Hyacinths, and the two classes of Scilla we list are seen far too seldom. We know you will like them. And be sure to include some of the Dutch and Spanish Iris and also a few of the Anemones.

9480

Chionodoxa Luciliae

Glory of the Snow

By far too few gardeners are acquainted with this lovely early-blooming bulbous plant. Its graceful white flowers are more or less tipped with rich blue at the end of each flower petal. Well-established bulbs furnish a number of flower-spikes which carry 4 to 6 blooms each. Plant the bulbs 3 inches deep and 2 inches apart in various locations throughout the garden, particularly in the rockery. They will provide a showy display for many weeks if planted in different exposures. 12 for 35¢; 100 for \$2.25.

Chionodoxa

Crocus—Harbingers of Spring

Hardly any other flower is so well adapted for naturalizing as the Crocus. Many people plant it in the lawn, where indeed it will make a good display. Yet, for permanent results, we suggest that it be planted in the foreground of shrubbery where the foliage can ripen properly and insure continued existence. Plant the bulbs about 4 inches apart and cover with 2 inches of fine soil. They bloom very early and make a wonderful display with their bright colors. Easily grown in shallow pots for winter blooming in the house.

Perennial Flower Seeds

Perennials are the chief stand-by of the old-fashioned gardeners. They require little attention and respond generously to increased care and thorough cultivation. After once being established they will not only last many years but also increase in beauty with every season. The seed of perennials may be sown outdoors almost any time of the year.

Summer and fall sowings should be made in specially prepared beds, preferably boxed in with 8- or 10-inch boards and covered with a screen of lath or wide-meshed burlap. During the winter a covering of leaves or strawy manure, after the frost has touched the foliage, is all the protection needed to carry the plants safely through the winter.
